

PROJECT DYESKIT

Inclusive Village Wellness and Sustainable Future using AI

Village Well-Being Questionnaire — Ladakh

Adapted from the Bhutan Household Survey (GNH-style App Specification)

Estimated administration time: 20–25 minutes (interviewer-administered)

5-point Likert convention: 1 = Strongly Disagree | 2 = Disagree | 3 = Neutral | 4 = Agree | 5 = Strongly Agree

Source legend: **[Adapted]** kept from Bhutan source **[Modified]** reworked for Ladakh **[New]** not present in Bhutan source

How This Questionnaire Was Built

The Bhutan source document supplied was not a short question list — it is a 117-page mobile app data-entry specification for an ongoing household registration and asset-tracking tool. It captures per-land-parcel geotags, per-house equipment inventories, per-crop input/output accounting, and a 90-item chronic-disease dropdown. That level of granularity suits an administrative app, not a 20–25 minute wellness interview.

The adaptation followed four steps:

- Extracted every substantive question from the Bhutan spec — registration, food/production, demographics, health & disability, mental & emotional well-being, skills, hobbies, aspirations, unfulfilled needs, wishes, landholding, housing, water, energy, mobility, forestry, and business.
- Classified each item as Keep / Modify / Remove / Expand against Ladakh's context and Project DYESKIT's seven-dimension VWBI framework.
- Collapsed app-level granularity (per-parcel land records, per-house equipment checklists, 90-item disease dropdowns) into survey-level indicator questions a respondent can answer in one sitting — flagged throughout as “Modified — condensed from app-level detail.”
- Re-mapped everything onto DYESKIT's seven dimensions (Physical, Financial, Emotional, Social, Environmental, Intellectual, Spiritual) plus two sections requested specifically: Demographics, and Technology/AI.

SECTION A — Demographic Profile

#	Question	Type	Response Options	Source
A1	Name of respondent (optional / can be coded ID)	Open	Text	Adapted
A2	Village	Dropdown	[Village list for survey area]	Adapted
A3	Block / Tehsil	Dropdown	[Block list — Ladakh admin units]	New
A4	District	Dropdown	Leh / Kargil	Modified — Bhutan had no equivalent district split; Ladakh is a UT with 2 districts
A5	Years lived in this village	Numeric	___ years	New
A6	Age	Numeric	___ years	Adapted
A7	Gender	Single-select	Male / Female / Other / Prefer not to say	Adapted
A8	Marital status	Single-select	Married / Single / Divorced / Separated / Widowed	Adapted — added Widowed, missing in source
A9	Household size (number of members)	Numeric	___ members	Adapted
A10	Type of family	Single-select	Nuclear / Joint / Extended	New — Bhutan spec tracked members but not family typology
A11	Religion	Single-select	Buddhist / Muslim / Other	Modified — Ladakh has a significant Buddhist–Muslim split (Leh vs Kargil)
A12	Housing type	Single-select	Traditional Ladakhi stone/mud-brick / Concrete-cement / Modern hybrid / Other	Modified — Bhutan's Long House replaced with Ladakhi vernacular types
A13	Highest education level (respondent)	Single-select	No formal education / Primary / Secondary / Higher secondary / Diploma / Bachelor's / Master's / Doctorate / Monastic education / Vocational-skill training / Other	Adapted
A14	Primary occupation	Single-select	Farmer / Pastoralist (nomadic herding) / Tourism operator-guide / Handicraft artisan / Government employee / Teacher / Healthcare worker / Hospitality worker / Small business owner / Transport operator / Monk/Nun/Religious worker / Army/Defence-affiliated / Student / Homemaker / Other	Modified — removed Bhutan-specific roles, added Army/Defence-affiliated and Changpa pastoralist framing
A15	Yearly household income (range)	Single-select	<₹1 lakh / ₹1–3 lakh / ₹3–5 lakh / ₹5–10 lakh / >₹10 lakh	Modified — currency and brackets localized to India/Ladakh
A16	Household has a bank account	Yes/No	Yes / No	Adapted
A17	Household has savings or investments	Yes/No	Yes / No	Adapted

SECTION B — Physical Wellness

Maps to DYESKIT Physical dimension: Nutritional BMI, Chronic/high-altitude illness, Access to healthcare, Physical activity

#	Question	Type	Response Options	Source
B1	Self-reported height and weight	Numeric	cm / kg (used to compute BMI)	Adapted
B2	Dietary pattern	Single-select	Predominantly vegetarian / Predominantly non-veg / Balanced / Vegan / Other	Adapted
B3	Do you have any diagnosed chronic illness?	Single-select	No chronic illness / Managed with medication / Unmanaged or severe	Modified — condensed from Bhutan's 90-item disease dropdown into DYESKIT's 3-tier adequacy scale
B3a	If yes, please specify condition (optional)	Open	Text	Modified
B4	Do you or any household member experience symptoms of high-altitude illness (breathlessness, chronic headache, fatigue at altitude)?	Single-select	Never / Occasionally / Frequently	New — Ladakh-specific; no equivalent in Bhutan spec
B5	Any household member with a disability (mobility, sensory, or other)?	Yes/No	Yes / No	Modified — condensed from Bhutan's 15-category motor-disability dropdown
B5a	If yes, briefly describe	Open	Text	Modified
B6	Distance/access to nearest healthcare facility	Single-select	Health centre within village / Regular mobile health camp / Facility 10–20 km away / Facility beyond 20 km / Seasonal access only (cut off in winter)	Modified — added seasonal access, critical in Ladakh's winter isolation
B7	In the last year, were you or a household member unable to reach a hospital/health post due to road closure, weather, or distance?	Yes/No	Yes / No	New — Ladakh winter-isolation indicator
B8	Physical activity / functional ability	Single-select	Active daily physical work (farming, herding, walking, labour) / Moderate activity / Sedentary or physically restricted	Adapted
B9	Do you get adequate sleep (7+ hours) most nights?	Single-select	Always / Mostly / Rarely / Never	New
B10	Household sanitation facility	Single-select	Compost toilet/ Western toilet/ No toilet (open)	Adapted
B11	Do you engage in preventive healthcare (checkups, vaccination, health camps)?	Frequency	Regularly / Occasionally / Never	Adapted
B12	Rate: "I am satisfied with my current physical health."	Likert (1–5)	1–5	New
B13	Household drinking water source	Multi-select	Piped/tap supply / Stream or river / Glacier melt-fed channel / Spring / Groundwater/borewell / Water tanker	Modified — added glacier-melt as a distinct source, central to Ladakh water security
B14	Drinking water quality	Single-select	Safe to drink directly / Needs boiling/filtration / Occasionally contaminated / Unsafe/contaminated	Adapted

SECTION C — Mental & Emotional Wellness

Maps to DYESKIT Emotional dimension: self-reported state, stress management, family/social support, substance dependence

This was one of the strongest, most directly transferable sections of the Bhutan tool — the underlying constructs travel well across contexts with light wording adjustments.

#	Question	Type	Response Options	Source
C1	Overall, how are you currently feeling emotionally?	Single-select	Mentally & emotionally fit (calm, focused) / Generally stable (minor stress, manageable) / Facing challenges (frequent stress/anxiety) / Prefer not to answer	Adapted
C2	Do you talk about your feelings with others?	Single-select	Regularly / Occasionally / Rarely / Prefer not to answer	Adapted
C3	What kind of emotional support do you have access to?	Multi-select	Family/friends / Professional support (counselling) / Religious/spiritual community / Personal coping strategies (prayer, walking, art, hobbies) / None	Modified — added religious/spiritual community as a distinct support channel
C4	How do you manage and recover from stress?	Single-select	Low stress, quick recovery / Moderate stress, moderate recovery / High stress, difficulty recovering / Prefer not to answer	Adapted
C5	Rate: "In the last month, I have felt hopeful about the future."	Likert (1–5)	1–5	New
C6	Rate: "I often visit outside Ladakh if yes (reason text)"	Likert (1–5)+ text	1–5	New — Ladakh-specific; seasonal road closures create isolation risk
C7	Do you or household members use any of the following regularly?	Multi-select	Tobacco / Alcohol / Local brew (chhang, etc.) / None / Prefer not to answer	Modified — localized substance list, retained opt-out
C8	How would you rate your overall life satisfaction?	Likert (1–5)	1 = Very dissatisfied → 5 = Very satisfied	New
C9	Has migration of family members (for work/study) affected your household's emotional well-being?	Single-select	Not applicable / Yes, positively (opportunity, income) / Yes, negatively (loneliness, loss of support) / Mixed	New — Himalayan youth-outmigration named DYESKIT concern

SECTION D — Social Wellness

Maps to DYESKIT Social dimension: community participation, social trust, gender/inclusion, inter-generational bonding

#	Question	Type	Response Options	Source
D1	Participation in community activities (festivals, village meetings, religious events)	Frequency	Regular / Occasional / None	Adapted
D2	Rate: "I trust the people in my village/community."	Likert (1–5)	1–5	Adapted
D3	How would you describe the level of conflict or tension in your community?	Single-select	High trust, low conflict / Moderate trust / Frequent conflict or insecurity	Adapted
D4	Do women and marginalized groups participate equally in community decisions?	Single-select	Equal participation / Partial inclusion / Exclusion or discrimination	Adapted
D5	Rate: " youth are actively engaged in community life."	Likert (1–5)	1–5	Adapted
D6	Is there a functioning village-level institution (Gram Sabha, Village Committee, LAHDC-linked body, monastery committee) residents can turn to?	Yes/No + dropdown	Yes (dropdown) / No	New — Ladakh's LAHDC/Village Committee/monastic governance differs from Bhutan's setup
D7	Rate: "Women in my household/community have a say in major household or community decisions."	Likert (1–5)	1–5	New — women's empowerment named DYESKIT priority
D8	Have young people from your household left the village for work or study in the last 3 years?	Yes/No + count	Yes (how many: ____) / No	New — Ladakh youth-migration indicator
D9	Rate: "My community supports elderly members who live alone or need care."	Likert (1–5)	1–5	New
D10	Rate: "I feel my community would help me in an emergency (illness, disaster, financial crisis)."	Likert (1–5)	1–5	New

SECTION E — Environmental Wellness

Maps to DYESKIT Environmental dimension: water security, waste/sanitation, local food quality, climate resilience

#	Question	Type	Response Options	Source
E1	Is your household's water supply reliable year-round?	Single-select	Reliable year-round / Seasonal scarcity / Severe shortage or contamination	Adapted
E2	Have you noticed changes in glacier melt, snowfall, or stream flow over the last 10 years?	Single-select	Significant decrease / Some decrease / No noticeable change / Increase	New — Ladakh's glacier-dependent water security, no Bhutan equivalent
E3	Household waste management practice	Single-select	Segregation + proper disposal / Partial management / Open dumping	Adapted
E4	Wastewater disposal method	Single-select	Septic tank / Discharged into soil / Discharged into stream/river / Connected to treatment system	Adapted
E5	How often do you consume locally grown/organic food vs. packaged food?	Single-select	Mostly local/organic / Mixed local and packaged / Mostly packaged	Adapted
E6	Household's main cooking/heating fuel(s)	Multi-select	LPG / Firewood / Dung cakes / Kerosene / Solar / Electricity	Modified — solar weighted higher given Ladakh's solar potential
E7	Does your household or village use any renewable energy source?	Multi-select	Solar (household) / Solar (village micro-grid) / Micro-hydro / None	Modified — condensed from app-level micro-grid tracking
E8	Rate: "Climate change (erratic rainfall, glacial melt, temperature shifts) is already affecting my livelihood or daily life."	Likert (1–5)	1–5	Modified — made explicit and measurable for Ladakh
E9	Has your village adopted any water conservation or climate adaptation practice (rainwater harvesting, ice stupas/artificial glaciers, eco-housing, afforestation)?	Yes/No + detail	Yes (specify) / No	Modified — Ladakh-specific practices explicitly prompted
E10	Rate: "I am concerned about the growing volume of tourist-related waste in/near my village."	Likert (1–5)	1–5	New — tourism-driven waste is a named Ladakh pressure
E11	Rate: "I am aware of practical steps I can take to protect the local environment."	Likert (1–5)	1–5	New

SECTION F — Economic & Occupational Wellness

Maps to DYESKIT Financial dimension: income stability, sufficiency, savings/assets, livelihood diversity

#	Question	Type	Response Options	Source
F1	Primary source of household income	Single-select	Stable (govt job, pension, established tourism business, farming+livestock) / Seasonal or irregular / No stable income	Adapted
F2	Does your household income meet your needs year-round?	Single-select	Meets needs with a buffer / Meets basic needs, no buffer / Insufficient	Adapted
F3	Household savings/assets	Single-select	Savings, land, livestock, or SHG membership / Limited savings or assets / None / In debt	Adapted
F4	Number of distinct income sources in the household	Single-select	More than one / Single source / No clear source	Adapted
F5	Does your household depend on tourism-related income (guiding, homestay, transport, handicraft sales)?	Yes/No + detail	Yes (specify role) / No	New — sustainable tourism named DYESKIT priority
F6	Rate: "Tourism has been beneficial for my household's income."	Likert (1–5)	1–5	New
F7	Rate: "Tourism has created problems for my village (water stress, waste, price rise, loss of culture)."	Likert (1–5)	1–5	New
F8	Is your household engaged in traditional livelihood activities (pashmina/livestock rearing, subsistence farming, handicrafts)?	Multi-select	Livestock/pashmina rearing / Subsistence farming / Handicrafts / Traditional trade / None	Modified — condensed from Bhutan's per-crop/per-livestock accounting
F9	Are you aware of and using any government scheme for livelihood support (MGNREGA, PM-KISAN, livestock insurance, tourism/homestay schemes)?	Multi-select	Aware and using / Aware, not using / Not aware	Modified — localized to Indian/Ladakh UT schemes
F10	Rate: "I feel financially secure about my household's future."	Likert (1–5)	1–5	New
F11	Has extreme weather or a natural event (flash flood, landslide, drought, unseasonal snow) damaged your crops, livestock, or property in the last 5 years?	Yes/No + detail	Yes (specify) / No	New — climate-linked livelihood shock indicator
F12	Would you or a household member be interested in new livelihood opportunities (eco-tourism, organic farming, handicraft enterprise, solar-based enterprise)?	Multi-select	Yes — specify area(s) / Not interested	New

SECTION G — Intellectual Wellness

Maps to DYESKIT Intellectual dimension: education, continuous learning, digital/media literacy, civic awareness

#	Question	Type	Response Options	Source
G1	Highest education level achieved (household reference, if different from A13(respondents))	Single-select	No formal education / Primary / Secondary / Higher secondary / Diploma / Bachelor's / Master's / Doctorate / Monastic education / Vocational-skill training / Other	Adapted
G2	Are you currently learning any new skill or subject?	Frequency	Actively learning / Occasional learning / No learning engagement	Adapted
G3	What skills would you or your household like to learn?	Multi-select	Digital/computer literacy / Organic farming / Tourism & hospitality management / Handicraft techniques / Financial literacy / English language / Vocational/technical trade / Other	Modified — condensed from Bhutan's long multi-tier skills taxonomy
G4	Can you access and evaluate information using a smartphone/computer/internet?	Single-select	Yes, confidently / Yes, with some difficulty / No	Adapted
G5	Are you aware of your basic civic rights, entitlements, and duties (voting, local governance, land rights)?	Single-select	Well aware / Partially aware / Not aware	Adapted
G6	Are you aware of climate change and its likely impact on Ladakh?	Single-select	Well aware / Partially aware / Not aware	Modified — made climate-specific per DYESKIT priorities
G7	Rate: "Schools/educational facilities near my village are adequate."	Likert (1–5)	1–5	New
G8	Does your household face barriers to children's/adult's education (distance, cost, seasonal closure, lack of teachers)?	Multi-select	Distance / Cost / Seasonal/weather closure / Lack of teachers / No barriers	Modified — added seasonal/weather closure relevant to Ladakh school calendars

SECTION H — Spiritual & Cultural Wellness

Maps to DYESKIT Spiritual dimension: spiritual practice, sense of purpose, ethical living, inner peace/contentment

#	Question	Type	Response Options	Source
H1	How regularly do you engage in prayer, meditation, or religious/spiritual ritual?	Frequency	Regular / Occasional / None	Adapted
H2	Rate: "I have a strong sense of purpose and direction in my life."	Likert (1–5)	1–5	Adapted
H3	Rate: "My decisions are guided by ethical or spiritual values."	Likert (1–5)	1–5	Adapted
H4	Rate: "I generally feel a sense of inner peace and contentment."	Likert (1–5)	1–5	Adapted
H5	Do you have access to a monastery, mosque, or other place of worship/community gathering within a reasonable distance?	Single-select	Within village / Within 10 km / Beyond 10 km / Seasonal access only	Modified — condensed to a concrete access item, adapted to Ladakh's Buddhist/Muslim landscape
H6	Rate: "Traditional Ladakhi culture, language, and festivals are being well preserved in my village."	Likert (1–5)	1–5	New — cultural preservation named DYESKIT priority
H7	Do you feel younger generations are losing interest in traditional Ladakhi practices, language, or festivals?	Single-select	Strongly agree / Agree / Neutral / Disagree / Strongly disagree	New
H8	Do you participate in or support local festivals/cultural events (Losar, Hemis festival, village archery, local monastic events)?	Frequency	Regularly / Occasionally / Never	Modified — localized festival examples
H9	Rate: "I would like more support for preserving Ladakhi language, art, and spiritual practices."	Likert (1–5)	1–5	New

SECTION I — Technology, AI & Future Village Development

This section did not exist in the Bhutan source in any meaningful form (the source app spec is itself a data-collection tool, not a section about AI attitudes) — it is almost entirely New, built directly from Project DYESKIT's AI-enabled dashboard and chatbot concept.

#	Question	Type	Response Options	Source
I1	Do you own a smartphone?	Yes/No	Yes / No	New
I2	Household internet access	Single-select	Reliable broadband/4G-5G / Intermittent mobile data / No internet access	New
I3	Have you heard of "Artificial Intelligence" (AI) or used an AI-based tool/app (chatbot, voice assistant)?	Single-select	Yes, and I use it / Yes, but I don't use it / No, never heard of it	New
I4	Rate: "I would trust an AI-based tool to answer questions about my village's services (water, healthcare, schemes)."	Likert (1–5)	1–5	New
I5	Would you be willing to use an AI/chatbot tool for any of the following?	Multi-select	Healthcare information / Education/learning support / Agriculture/livestock advice / Tourism/business support / Village service information / Not interested in any	New
I6	What is the biggest barrier to using digital/AI tools in your household?	Single-select	No smartphone/device / No internet / Cost / Lack of digital skills / Language barrier / No barrier	New
I7	Would you prefer such tools to be available in Ladakhi/Bhoti or local dialect rather than only English/Hindi?	Yes/No	Yes / No / No preference	New
I8	Rank your village's top development priorities (rank top 3)	Ranking	Water security / Healthcare access / Roads & connectivity / Education / Employment-livelihood / Renewable energy / Waste management / Tourism management / Cultural preservation / Digital connectivity	New
I9	Rate: "I believe technology (including AI) can genuinely help improve life in my village."	Likert (1–5)	1–5	New

SPSS Coding Table (Variable Reference)

Every scored item maps to a variable name suitable for direct SPSS import. Ordinal 'adequacy-anchor' items are pre-coded on DYESKIT's 1 / 0.5 / 0 point scale so they can feed the VWBI formula without conversion.

Q.ID	Variable Name	Label	Type	Coding	Dimension
A2	vil_name	Village	Categorical	Numeric code per village list	Demographic
A3	block_name	Block/Tehsil	Categorical	Numeric code per block list	Demographic
A4	district	District	Categorical	1=Leh, 2=Kargil	Demographic
A5	yrs_village	Years lived in village	Numeric	Continuous (years)	Demographic
A6	age	Age	Numeric	Continuous (years)	Demographic
A7	gender	Gender	Categorical	1=Male, 2=Female, 3=Other, 9=PNA	Demographic
A8	marital	Marital status	Categorical	1=Married,2=Single,3=Divorced,4=Separated,5=Widowed	Demographic
A9	hh_size	Household size	Numeric	Continuous	Demographic
A10	family_type	Type of family	Categorical	1=Nuclear,2=Joint,3=Extended	Demographic
A11	religion	Religion	Categorical	1=Buddhist,2=Muslim,3=Hindu,4=Christian,5=Other,9=PNA	Demographic
A12	housing_type	Housing type	Categorical	1=Traditional,2=Concrete,3=Hybrid,4=Other	Demographic
A13	education	Education level	Ordinal	0=None...8=Doctorate (see codebook)	Demographic / Intellectual
A14	occupation	Primary occupation	Categorical	1–15 per option list, 16=Other	Demographic / Financial
A15	income_band	Yearly HH income band	Ordinal	1=<1L,2=1–3L,3=3–5L,4=5–10L,5=>10L	Demographic / Financial
A16	bank_acct	Bank account	Binary	1=Yes, 0=No	Demographic / Financial
A17	savings	Savings/investments	Binary	1=Yes, 0=No	Demographic / Financial
B1	bmi	Nutritional status (BMI-derived)	Computed	1=Normal(1pt), 0.5=Mild, 0=Severe	Physical
B3	chronic_ill	Chronic illness status	Ordinal	1=None(1pt),0.5=Managed,0=Unmanaged	Physical
B4	altitude_symp	High-altitude illness symptoms	Ordinal	1=Never,2=Occasionally,3=Frequently	Physical
B5	disability	Disability in household	Binary	1=Yes, 0=No	Physical
B6	health_access	Healthcare access	Ordinal	1=In village(1pt),2=10-20km(0.5pt),3=Beyond/seasonal(0pt)	Physical
B7	health_cutoff	Unable to reach healthcare (weather/road)	Binary	1=Yes, 0=No	Physical
B8	phys_activity	Physical activity level	Ordinal	1=Active(1pt),2=Moderate(0.5pt),3=Sedentary(0pt)	Physical
B10	sanitation	Sanitation facility	Ordinal	1=Proper,2=Partial,3=None	Physical / Environmental
B12	phys_satisf	Physical health satisfaction	Likert	1–5	Physical
B13	water_source	Drinking water source	Multi-binary	1=Yes/0=No per source (7 dummy vars)	Physical / Environmental
B14	water_qual	Drinking water quality	Ordinal	1=Safe(1pt),2=Needs treatment(0.5pt),3=Unsafe(0pt)	Physical / Environmental

Q.ID	Variable Name	Label	Type	Coding	Dimension
C1	emo_state	Overall emotional state	Ordinal	1=Fit(1pt),2=Stable(0.5pt),3=Challenges(0pt),9=PNA	Emotional
C2	emo_comm	Talks about feelings	Ordinal	1=Regularly,2=Occasionally,3=Rarely,9=PNA	Emotional
C3	emo_support	Support system type	Multi-binary	1=Yes/0=No per option (5 dummy vars)	Emotional
C4	stress_res	Stress & resilience	Ordinal	1=Low stress(1pt),2=Moderate(0.5pt),3=High(0pt),9=PNA	Emotional
C5	hopeful	Hopeful about future	Likert	1–5	Emotional
C6	winter_isolation	Winter isolation	Likert	1–5	Emotional
C7	substance_use	Substance use	Multi-binary	1=Yes/0=No per substance	Emotional
C8	life_satisf	Life satisfaction	Likert	1–5	Emotional
C9	migration_impact	Migration's emotional impact	Categorical	1=N/A,2=Positive,3=Negative,4=Mixed	Emotional / Social
D1	comm_particip	Community participation	Ordinal	1=Regular(1pt),2=Occasional(0.5pt),3=None(0pt)	Social
D2	trust	Trust in community	Likert	1–5	Social
D3	conflict_level	Conflict/tension level	Ordinal	1=High trust(1pt),2=Moderate(0.5pt),3=Frequent conflict(0pt)	Social
D4	gender_incl	Gender/social inclusion	Ordinal	1=Equal(1pt),2=Partial(0.5pt),3=Exclusion(0pt)	Social
D5	intergen_bond	Intergenerational bonding	Likert	1–5	Social
D6	local_inst	Functioning local institution present	Binary	1=Yes, 0=No	Social
D7	women_voice	Women's voice in decisions	Likert	1–5	Social
D8	youth_migration	Youth migrated (count)	Numeric	Continuous (count)	Social
D9	elder_support	Community support for elderly	Likert	1–5	Social
D10	emergency_support	Perceived community emergency support	Likert	1–5	Social
E1	water_security	Water security	Ordinal	1=Reliable(1pt),2=Seasonal(0.5pt),3=Severe(0pt)	Environmental
E2	glacier_change	Perceived glacier/snowfall change	Ordinal	1=Sig. decrease...4=Increase	Environmental
E3	waste_mgmt	Waste management practice	Ordinal	1=Proper(1pt),2=Partial(0.5pt),3=Open dumping(0pt)	Environmental
E4	wastewater	Wastewater disposal method	Categorical	1=Septic,2=Soil,3=River,4=Treatment system	Environmental
E5	food_quality	Local vs. packaged food	Ordinal	1=Local(1pt),2=Mixed(0.5pt),3=Packaged(0pt)	Environmental
E6	fuel_type	Cooking/heating fuel	Multi-binary	1=Yes/0=No per fuel type	Environmental
E7	renewable_energy	Renewable energy use	Multi-binary	1=Yes/0=No per source	Environmental
E8	climate_impact	Climate change impact perception	Likert	1–5	Environmental
E9	climate_adapt	Climate adaptation practice adopted	Binary	1=Yes, 0=No	Environmental
E10	tourism_waste	Tourism waste concern	Likert	1–5	Environmental

Q.ID	Variable Name	Label	Type	Coding	Dimension
E11	env_awareness	Environmental action awareness	Likert	1–5	Environmental / Intellectual
F1	income_source	Primary income source stability	Ordinal	1=Stable(1pt),2=Seasonal(0.5pt),3=None(0pt)	Financial
F2	income_suff	Income sufficiency	Ordinal	1=Buffer(1pt),2=Basic(0.5pt),3=Insufficient(0pt)	Financial
F3	savings_assets	Savings/assets	Ordinal	1=Yes(1pt),2=Limited(0.5pt),3=None/debt(0pt)	Financial
F4	livelihood_div	Livelihood diversity	Ordinal	1=Multiple(1pt),2=Single(0.5pt),3=None(0pt)	Financial
F5	tourism_dep	Tourism income dependence	Binary	1=Yes, 0=No	Financial
F6	tourism_benefit	Tourism perceived benefit	Likert	1–5	Financial
F7	tourism_problem	Tourism perceived problems	Likert	1–5	Financial / Environmental
F8	trad_livelihood	Traditional livelihood engagement	Multi-binary	1=Yes/0=No per category	Financial
F9	govt_scheme	Govt. scheme awareness/use	Ordinal	1=Using,2=Aware not using,3=Not aware	Financial
F10	fin_security	Financial security perception	Likert	1–5	Financial
F11	climate_shock	Climate-linked livelihood shock	Binary	1=Yes, 0=No	Financial / Environmental
F12	new_livelihood_int	Interest in new livelihoods	Multi-binary	1=Yes/0=No per area	Financial
G2	continuous_learn	Continuous learning	Ordinal	1=Active(1pt),2=Occasional(0.5pt),3=None(0pt)	Intellectual
G3	skill_interest	Skills wanted	Multi-binary	1=Yes/0=No per skill	Intellectual
G4	digital_literacy	Digital/media literacy	Ordinal	1=Confident(1pt),2=Some difficulty(0.5pt),3=No(0pt)	Intellectual
G5	civic_awareness	Civic rights awareness	Ordinal	1=Well aware(1pt),2=Partial(0.5pt),3=Not aware(0pt)	Intellectual
G6	climate_awareness	Climate change awareness	Ordinal	1=Well aware,2=Partial,3=Not aware	Intellectual / Environmental
G7	school_adequacy	School adequacy perception	Likert	1–5	Intellectual
G8	edu_barriers	Education barriers	Multi-binary	1=Yes/0=No per barrier	Intellectual
H1	spiritual_practice	Spiritual practice frequency	Ordinal	1=Regular(1pt),2=Occasional(0.5pt),3=None(0pt)	Spiritual
H2	life_purpose	Sense of purpose	Likert	1–5	Spiritual
H3	ethical_living	Ethical/values-guided decisions	Likert	1–5	Spiritual
H4	inner_peace	Inner peace/contentment	Likert	1–5	Spiritual
H5	worship_access	Access to place of worship	Ordinal	1=In village,2=Within 10km,3=Beyond 10km,4=Seasonal only	Spiritual
H6	culture_preserv	Cultural preservation perception	Likert	1–5	Spiritual
H7	youth_culture_loss	Perceived youth disengagement from culture	Ordinal	1=Strongly agree...5=Strongly disagree	Spiritual / Social
H8	festival_particip	Festival/cultural participation	Ordinal	1=Regular,2=Occasional,3=Never	Spiritual
H9	culture_support_want	Desire for cultural preservation support	Likert	1–5	Spiritual
I1	smartphone_own	Smartphone ownership	Binary	1=Yes, 0=No	Technology

Q.ID	Variable Name	Label	Type	Coding	Dimension
I2	internet_access	Internet access	Ordinal	1=Reliable,2=Intermittent,3=None	Technology
I3	ai_awareness	AI awareness/use	Ordinal	1=Uses it,2=Aware not using,3=Never heard	Technology
I4	ai_trust	Trust in AI for village services	Likert	1–5	Technology
I5	ai_willingness	Willingness to use AI (by domain)	Multi-binary	1=Yes/0=No per domain	Technology
I6	digital_barrier	Biggest digital/AI barrier	Categorical	1–6 per option list	Technology
I7	language_pref	Local language interface preference	Categorical	1=Yes,2=No,3=No preference	Technology
I8	dev_priority	Village development priority ranking	Ranking	Rank 1–3 assigned per option (10 dummy rank vars)	Technology / Cross-cutting
I9	tech_optimism	Belief technology can help village	Likert	1–5	Technology

PNA = Prefer Not to Answer (recommend coding as system-missing, or 9, per analyst preference).

Dimension Mapping Summary

DYESKIT Dimension	Questionnaire Section(s)	Approx. Item Count
Physical	B1–B14	14
Financial (Economic & Occupational)	F1–F12 (+ A14, A15)	14
Emotional (Mental & Emotional)	C1–C9	9
Social	D1–D10	10
Environmental	E1–E11	11
Intellectual	G1–G8	8
Spiritual (& Cultural)	H1–H9	9
Demographic (context, not scored)	A1–A17	17
Technology/AI (cross-cutting; informs dashboard design, not core VWBI score)	I1–I9	9

Total core items: ~101 (excluding open-text follow-ups) — consistent with a 20–25 minute interview.

Sections B, C, D, E, F, G, H each contain four indicator-anchor questions mapped directly onto DYESKIT's existing 28-indicator / 7-dimension VWBI adequacy scale (1 / 0.5 / 0 scoring). The remaining items are contextual, diagnostic, and Ladakh-specific additions that enrich the qualitative/interpretive layer (SWOT analysis, AI dashboard narratives) without disrupting the core scoring model.

Review: Gaps and Recommendations

1. Village/Block sampling frame not yet defined.

A2/A3 assume the DYESKIT team will supply a village and block list before fieldwork; these should be pre-populated as dropdowns rather than open text to keep coding clean.

2. High-altitude and seasonal-access items are new and unvalidated.

B4, B7, C6, and G8 (seasonal closure) are newly written for this context and haven't been field-tested. Recommend a small pilot (10–15 respondents across 2–3 villages spanning different altitudes) before full rollout, to check comprehension and response distribution.

3. Religious/cultural sensitivity in Leh vs. Kargil.

A11 (religion) and Section H items should be piloted separately in Buddhist-majority and Muslim-majority villages; H5 (worship access) and H8 (festival examples) may need village-specific wording (e.g., referencing Islamic festivals in Kargil rather than only Losar/Hemis).

4. Substance-use item (C7) needs careful field protocol.

Even with a "prefer not to answer" option, self-reported substance use is sensitive. Recommend interviewer training on neutral tone and, if possible, self-administration (respondent marks the answer privately) for this item specifically.

5. Multi-select and ranking items will need careful SPSS structuring.

Several items (B13, C3, C7, E6, E7, F8, F9, F12, G3, G8, I5) are multi-select, which typically require conversion into separate dummy variables during data entry — this is noted in the coding table but should be built into the data-entry app/form now, not retrofitted later.

6. No explicit water-conflict or resource-dispute item.

Given documented tensions over water allocation between agricultural and tourism uses in parts of Ladakh, consider adding one item under Environmental or Social wellness in a future revision (e.g., "Has there been conflict or disagreement in your village over water allocation in the last 3 years?").

7. Length check.

At ~101 items, with several multi-select/ranking questions, actual administration time may run closer to 25–30 minutes for less-literate or elderly respondents. Consider a "core" vs. "extended" module split if time becomes a constraint in the field — Sections A, B, C, D, F, I as core; E, G, H as extended (or vice versa depending on DYESKIT's analytical priorities).

8. AI/Technology section is untested against the actual dashboard design.

Section I was built from the proposal's description of the planned chatbot/dashboard rather than a working prototype. Once the DYESKIT AI dashboard mock-up is further along, I5 and I6 in particular should be revisited to ensure they map to real, buildable features rather than aspirational ones.

9. No explicit consent/ethics preamble included.

This questionnaire assumes a standard consent script (purpose, confidentiality, right to skip/withdraw) precedes Section A — not included here as it wasn't part of either source document, but should be added before fieldwork, especially given the sensitive items in Sections C and H.
