

What This Wellbeing Survey Means for You

Why We Ask These Questions

This survey is used to understand how people in the village are doing and what the village needs most.

It is designed to highlight opportunities for growth and support each person.

It is for improving village planning and support.

What We Look At

We look at daily life in seven areas:

- Physical
- Occupational
- Emotional
- Social
- Environmental
- Intellectual
- Spiritual

We also look at village systems like water, housing, food, energy, and transport.

How Your Answers Help

Your answers are combined with others in the village.

This helps identify:

- **Provide clear guidance for local leadership:** By highlighting what is already working well and where extra support is needed most, village committees can create more effective action plans.
- **Direct resources where they are needed most:** Whether it's advocating for new water infrastructure, asking for educational support, or organizing community skill-sharing, your input helps pinpoint which opportunities to prioritize first.
- **Support evidence-based appeals for funding:** When the village requests support or grants from the government or NGOs, having comprehensive data ensures these proposals are taken seriously.
- **Enable fair tracking of our progress:** By participating honestly, the village establishes a baseline to measure growth year over year, ensuring that no one is left behind as the community develops.

Immediate and Future Benefits of Participation

By participating in this exercise, the community unlocks value that grows over time:

- **Current Pilot Phase:** In the short term, your village will get access to actionable insights displayed clearly on a dashboard. This helps everyone see exactly where we stand today to make better local decisions.
- **Future Vision:** As the system develops and matures past key thresholds, it will evolve into a full-scale AI advisory platform. This future system will seamlessly link the village directly to new marketplaces, wellbeing support, and extensive knowledge resources.

The ultimate goal is for the community to completely **empower themselves**. These long-term benefits serve as a powerful incentive to be a part of this journey from the very beginning.

What Happens After the Survey

The village gets a clear picture of strengths and gaps.

This can guide:

- Better local planning
- Better use of funds
- Better support programs
- Better tracking of progress over time

Important Points

- Your personal data is kept completely confidential and secure.
- The goal is community improvement, shared progress, and finding opportunities to grow.
- Honest answers help us build the best possible plan for the village.

In Simple Terms

Think of this as a village health check.

It helps answer:

- Are people doing better or worse?
- Are village systems strong enough?
- What should we improve next?

Your participation helps build a better plan for everyone.
